SUMMARY

Detail-oriented Demand Planning Executive with proven experience in forecasting, inventory management, and end-to-end import operations across China, MENA, and GCC regions. Skilled in analyzing sales trends, market dynamics, and stock movements to enhance forecast accuracy and align supply with business demand. Adept at coordinating with suppliers and freight forwarders, optimizing ERP workflows, and improving logistics efficiency—achieving a 25% boost in on-time delivery and a 20% reduction in freight errors.

EXPERIENCE

10/2023 - Present

Dubai, United Arab Emirates

Demand Planning Analyst

ANDS

- Planned, monitored, and forecasted inventory levels across China, MENA, and GCC markets to meet business and sales requirements, ensuring stock optimization and minimizing non-moving SKUs.
- Coordinated complete import operations from purchase order issuance to customs clearance, aligning with freight forwarders and suppliers to achieve timely and cost-effective imports.
- Conducted detailed analysis of stock movement, sales data, and demand trends to generate accurate forecasts, while preparing import costing, pricing, and margin reports for management approval.
- Maintained supplier and shipment records to support demand planning accuracy, negotiated freight rates, improved ERP-linked logistics workflows, reducing freight errors by 20% and enhancing on-time delivery by 25%.
- Performed ERP-based stock reconciliation and administrative tasks, ensuring accuracy between system records and physical inventory.

06/2022 - 10/2022

Jamshedpur, India

Inventory Operations Analyst

Global Automobiles

- Assisted in managing and supervising spare parts flow, maintaining 98% inventory accuracy and 95% on-time delivery by supporting ERP and supplier coordination.
- Monitored, prepared, and reported key inventory KPIs; supported lean initiatives that improved turnover by 20% and reduced holding costs by 15%.
- Assisted procurement activities by verifying and filing purchase records, tracking supplier performance, and ensuring 98% parts availability with faster sourcing cycles.
- Helped implement and improve warehouse processes, dispatching stock efficiently, reducing excess, and boosting space utilization to strengthen working capital.
